JUJA, KENYA

Hiring Manager,

I am writing to express my interest in the Senior Systems Developer position at Kenya Power and Lighting Company PLC, as advertised. I have read the company's goals and vision, and I believe that this would be a great opportunity for me to seek challenging opportunities where I can fully use my skills and contribution for the success of KPLC.

Having a bachelor's degree in software engineering and a master's degree in Artificial Intelligence. I am confident that my technical skills and experience make me an excellent candidate for the position. I have gained experience as a Website and System Designer & Developer at Blue Dress Internet Marketing, where I maintained and updated clients' websites while troubleshooting technical problems. Additionally, I worked with cross-functional teams to develop content criteria that met clients' objectives while keeping up to date with the latest web applications and programming practices.

Furthermore, I ensured data protection and easy recoverability in the event of system failure by backing up files from websites to local directories.

As a Software Engineer Intern at Eim Solutions Ltd, I provided end-to-end consulting, implementation, and support services for SAP solutions, including S4H implementation, SOH/S4H migration, BI, and Mobility. I have also worked as a part-time Mentor and Developer at Infinitive Systems Academy, where I conducted code reviews, mentored junior developers, and managed software installation and maintenance. These experiences have honed my skills in developing fully functional programs with clean, testable code while ensuring seamless operation and minimal downtime for clients.

I am excited about the opportunity to bring my skills and expertise to Kenya Power and Lighting Company PLC, and I am confident that my technical capabilities and experience make

me a valuable addition to the team. Thank you for considering my application. I look forward to the opportunity to discuss my qualifications in more detail.
